

Clarity Care Account Disaster Relief for COVID-19

Show your employees how much you care by giving them financial assistance to address some of their most basic needs during this time of crisis.

EASY TO SET UP AND ADMINISTER

Simply designate the amount you wish to contribute per employee and what type of expenses you want the account to cover. Your employee gets easy access to their relief funds through their current **Clarity Benefit Card** or in the form of new **Clarity Care Card** – supported by an intuitive and easy-to-navigate online and mobile account experience.

SO MUCH MORE THAN A GIFT CARD

The **Clarity Care Account** is designed to give you flexibility and control over how dollars are spent.

- **Funding flexibility.** Distributing employee relief funds through this account gives you added protection and the ability to add additional funds if needed. You can fund employee accounts in real time and to predefined amounts (e.g. families get \$1,000, singles get \$500).
- **Preserve unused funds.** Unlike cash or gift cards, you only pay for what's used. Any funds not spent can be returned to you.
- **Control how the dollars are spent.** You control how the funds can be used – ensuring funds are used for services that are deemed most critical. This includes restricting purchases to specific merchants, such as home office supplies and educational resources.
- **Real-time expense tracking.** Gain a real-time view into where and how your employees are spending their relief dollars, monitor employee balances, track tax reporting and more.
- **Intuitive experience.** Easy-to-navigate online experience ensures your employees have easy access to the answers they need, such as their card balance.

EXAMPLES OF ASSISTANCE PROGRAMS

The **Clarity Care Account** supports several different configurations to allow you to select the merchant/spend categories you believe will be most impactful to your employees. Those options include:

- **Healthcare** – in the face of a major healthcare crisis, supplement your employee healthcare costs with additional dollars or help cover furloughed employees medical expenses.
- **Office supplies** – your employees can set-up their work-from-home environment for optimal productivity.
- **Education** – parents can occupy and provide enriching activities to children that are home from school.
- **Cell Phone/Wifi** – helps offset extra costs employees incur while working from home.
